Secure Online Backup for Businesses

Online Backup for Business Servers

Affordable, easy-to-use backup for server environments

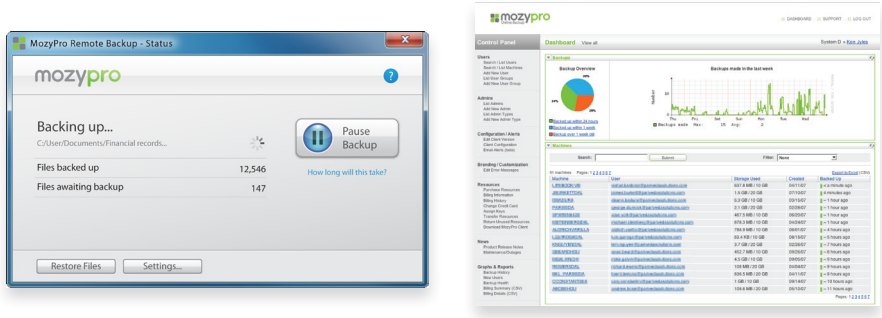

Online backup for servers made simple

As a business professional, you know the importance of keeping the data, financials, and administrative materials stored on your employees' computers secure. But what about all the files stored on your business' servers?

You don't have time for backup solutions that take months to set up, require thousands of dollars in hardware costs, and force you to hire someone to oversee it all. Yet the critical task of up your servers can be an expensive and challenging endeavor as digital data continues to grow.

MozyPro for servers provides small businesses with a simplified management tool for online backup that scales with your business and ensures important server databases and business files are backed up safely and easily accessible.

With MozyPro, you'll get the tools to take control

MozyPro for servers gives you:

- Online backup for your SQL and Exchange environments
- Simple online administration console
- Automatic or scheduled backups
- The highest security standards with military-grade encryption
- Server backup designed specifically for small businesses

The MozyPro advantage

Simple

Manage multi-user environments from the convenience of a web-based administrative console.

Secure

Mozy employs the highest security standards and stores your data in world-class data centers.

Affordable

Secure backup solutions start at less than \$7 per month, with no setup fees, no hardware to purchase, and little management required.

Professional support

Websted LLC support technicians are available 24/7/365 . Contact us to get your web backup Today!

MozyPro feature set

Security

- **Encryption:** All user data is encrypted locally with military-grade encryption prior to transfer via a 128-bit SSL connection. Users can choose a managed encryption key or a personal key for added security.
 - **Data centers:** All data centers employ state-of-the-art security and are SAS70 or ISO 27001 certified and, where applicable, adhere to European Union Safe Harbor Privacy Principles.
 - **Near continuous data protection:** Mozy automatically detects and backs up new and changed files.
 - **Alerts:** Administrators may create customized email alerts regarding the backup health of their account to be sent to their email address on a daily, weekly, or, monthly basis.
-

Ease of use

- **Automatic or scheduled backups:** Tell MozyPro when to perform your backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled backups can be performed daily or weekly at a specified time of day.
 - **Block-level incremental backups:** After the initial backup, Mozy only backs up new or changed portions of files, which saves bandwidth and ensures future backups are lightning fast.
 - **Bandwidth throttling:** Users can determine how much bandwidth they want to dedicate to their backups so other high-priority services can run unimpeded.
 - **Multiple restore options:** Users and administrators can restore data via the Mozy software client, through the web, or by ordering a DVD restore. Windows users can also restore data via right-click or through the Mozy Virtual Drive.
 - **Local backup with Mozy 2xProtect™:** Windows users can now back up locally to an external device as well as online to Mozy data centers for double protection.
-

Platform and file support

- **Version (snapshot) support:** Restore file versions up to 30 days in the past.
 - **SQL, Exchange, and network drive support:** Mozy backs up common business applications running on Windows servers.
 - **Bandwidth throttling:** Users can determine how much bandwidth they want to dedicate to their backups so other high-priority services can run unimpeded.
 - **Windows and Mac support:** MozyPro supports Windows 7, 2008, Vista, XP, 2003, & 2000 (including servers) and Mac OS X 10.6, 10.5, & 10.4 (including servers).
 - **Open and locked file support:** MozyPro backs up all open and locked files, including Outlook PST files.
-
